Multiple work reductions

Where multiple work is covered by more than one of the above categories other than electrical work, then the appropriate charge is calculated by paying the full amount for the most expensive category and only 50% for the other applicable category, based upon the cost of the additional work **provided this work is undertaken at the same time**.

Reductions do **not** apply where one of the other categories is electrical work.

Reductions for multiple works assume that work will be carried out at the same time, and that some inspections of the multiple elements of work can be combined. Additional charges may be made for inspections if each element of work is carried out over separate / different time periods.
