Downland Water Supply

Ref: EFOI / 6835

Information Request

As a council tax payer, would you please tell me how much money was budgeted to upgrade the Downland water supply to Chalk Farm reservoir?

Response by Eastbourne Borough Council

There are not separate funds budgeted for specific works in connection with parts of the downland water supply. There is an annual budget set aside for maintenance on the system of £11,600.

The council also has a separate budget for capital repairs on non-residential property across the borough and any capital works on the downland water supply would be considered for expenditure from this budget.

Any issues impacting on the water supply are considered an extremely high priority by the council and we always work to resolve them as quickly as possible.
