Introduction

In July 2019 we declared a climate emergency. The main purpose of this is was to commit to becoming carbon net zero and fully climate resilient by 2030. In some ways it was an easy thing to do; climate change was high profile once again and a report by the Independent Panel on Climate Change had stated that it is likely temperatures will exceed 1.5 degrees between 2030 and 2052 at current levels of CO₂ with highly negative impacts on humanity and nature.

The difficult bit comes next. It requires legislation and action at all levels, from the national to the local and partnerships between council, business, local organisations and communities.

I started working in Lewes at the Community Recycling Centre in Lewes just over one week before the floods in 2000 which caused so much heartache and devastation to the town. The flood was a wake-up call to local people and decision makers to consider the impacts of climate change in all that we do. This culminated with the Coastal Communities 2150 Project in 2012 which was a community partnership brought together to communicate the risks of climate change to communities along the coast and the Ouse Valley.

The partnership approaches which had formed over the years were essentially ended by the 2008 recession as resources focused on sustainability and climate change diminished. With the declaration of the climate emergency this work has begun again with renewed focus and vigour.

Our corporate plan emphasises the priority of tackling climate change. We have already begun decarbonising our social housing stock,

supporting natural flood and infrastructural flood alleviation schemes, initiating hydrogen projects and expanding wildflower and tree planting amongst many other carbon reduction initiatives.

It is a priority for me that we engage with our communities on climate change. We supported the partnership that successfully bid for funds to implement a climate partnership along the Ouse Valley. We've initiated a Community Climate Action Forum and Youth Climate Action Forum as well as Walking and Cycling Forum. It is vital that we work closely with the many active community groups in the District as well Town and Parish Councils.

This strategy and action plan sets out our blueprint moving forwards. It will change as new partnerships form and new opportunities arise, but it sets out clearly our carbon baseline, where we need to focus and what we need to do to tackle greenhouse gas emissions and adapt to a changing climate.

2020 was one of the three hottest years (with 2016 and 2019) and flood warnings were issued in Seaford 7 times.

We have a limited window to act

One of the few rays of light from the otherwise tragic experiences of Covid-19 was the rise in cycling due to less cars on the road, the increased appreciation of local nature and the rise in online working with less need to travel.

Whether we will see a resumption of former behaviours and CO₂ emissions remains to be seen but we have had a glimpse of how a better balance positively impacts not only on CO₂ emissions but also on our lives and we must ensure that this is not wasted.

Matthew Bird

Lead Cabinet Member for Sustainability

Part 1

The Vision for 2030

The Vision

By 2030 we will have a net zero carbon and fully climate resilient council. Through our partnerships we will have enabled the district as a whole to progress to net zero carbon and to address the ecological emergency.

Lewes District is a mix of urban and rural communities, coast and countryside, modern and historic buildings, agricultural and industrial businesses.

We have a beautiful district but it can be congested at times, it contains pollution hotspots particularly in Newhaven and Lewes town, it has rural areas with limited public transport, it lacks comprehensive cycling and walking routes, it's vulnerable to flooding and is suffering biodiversity losses in line with the alarming national and international trends. It has areas requiring economic regeneration, it needs more affordable housing and we need to reduce income inequality.

As a result we accept and acknowledge that we have a huge amount of work ahead of us to meet our ambition of becoming a net zero carbon and climate resilient council by 2030 and that we will be doing this with uncertain financial resources.

There is enormous enthusiasm and capacity in our local communities to help us meet these challenges. We have seen how fast we can act and come together and enable massive change when faced with the urgent and

common threat posed by the Coronavirus pandemic. We need to translate this urgency to tackling the climate change and ecological emergency. Although climate change will occur and impact on our lives we have a small window in which to reduce the more severe impacts of climate change, as long as we act now to cut emissions and prepare our communities for some inevitable changes.

Our own experience of flooding within the district, the stark predications of the effects of sea level rise on our coastal communities in and around Seaford and Newhaven, and the impacts of cliff erosion in Peacehaven, drives our resolve to enable climate resilient and sustainable communities.

Arresting biodiversity loss is inextricably tied to climate resilience, flooding impacts, and the ability to sequester and store carbon. Committing to nature-based solutions is essential for our recovery from the current Covid-19 crisis, and to better avoid future pandemics promoting healthy, thriving and resilient communities for the future.

The 'Declaration of the Climate Emergency' is our public statement that work the Council

PHOTO © SDNPA Charlie Hellewell

and others, locally and nationally, already do to mitigate and adapt to climate change must be ramped up and progressed at pace.

But we cannot do this alone.

We have committed to becoming a net zero carbon Council by 2030. This means reducing our directly controllable emissions to as low as possible and then, if required, investing in solutions to reduce the remaining carbon emissions (offsetting).

We have also committed to support and work with others to make the district net zero carbon by 2030 though this target will be much harder to achieve.

We will use our influence and lobbying function to enable this and we will lead by example. We will work in partnership with the community to break down current barriers and enable delivery of projects.

Working together locally

We can only deliver on our vision and strategic goals effectively by understanding all the aspects the council can directly act on and those that we can only deliver by working with others in public, private and voluntary sectors across the district.

Regional Partnerships and Networks

Various partnerships and networks already exist and will be developed to further both district and regional zero carbon aims. New partnerships are in development to further objectives for specific purposes such as retrofitting the social housing stock.

The **Greater Brighton city region** has pledged to help tackle the climate change crisis and place itself at the centre of partnership efforts to effect real change.

Together the partners can use their combined authority, lobbying power, expertise and knowledge to work towards **ten pledges** on a range of environmental issues chiefly concerning water and energy conservation.

The Sussex Local Nature Partnership

aims to work across sectors and organizations to secure the healthiest ecological system possible thereby protecting and enhancing the natural environment and all that it gives us. This vision is the key guiding principle behind the work of the LNP, both in terms of its direct delivery and in terms of any advice it may give, the statements it makes and the positions it

may hold. **The Green Growth Platform** is the South East Regional Hub of Clean Growth UK, a national business-innovation network that has collectively supported 1000s of businesses across the UK to innovate and grow. Clean Growth UK has hubs in Brighton, Liverpool and Portsmouth. They provide access to university led research and skills through the Greater Brighton city region working groups.

Partnerships have also developed to enable funding bids to take place, these include:

Ouse Valley CARES a partnership formed of local organisations and community groups including Lewes District Council and South Downs National Park. The partnership was successful in obtaining funding from the National Lottery Community Fund to develop a range of projects tackling climate change along the Ouse Valley.

Changing Chalk is focused on the chalk grassland landscape of the Sussex Downs and the communities of the coastal urban fringe of Brighton and Hove, Eastbourne and Lewes. Development funding of £138,300

has been awarded by The National Lottery Heritage Fund to help the Changing Chalk partnership progress their plans to apply for a full grant in 2021. This partnership, led by the National Trust will bring together people and nature, over a five-year period, to tackle the threats, grasp the opportunities and celebrate the heritage that the area offers.

Harnessing Community Action and Expertise

The district is home to a multitude of individuals, organisations, charities, schools, Community Interest Companies and businesses that are like-minded to achieve sustainability goals such as lowering carbon emissions, reducing pollution, improving the natural environment, reducing poverty, promoting community cohesion and more. We are also lucky enough to be close to 2 world leading universities in the fields of sustainability, environment policy and engineering solutions.

Local initiatives include: Plastic Free groups in Newhaven, Seaford and Lewes; Greenhavens Network; Cycle Seahaven; Cycle Lewes; Lewes Walking and Cycling Forum; Refill; OVESCO; Transition Town Lewes; Lewes Climate Hub; Seaford Alliance; amongst many others both long running and newly emerging.

There is so much knowledge, experience and expertise that the council desired to bring this together and make it available to others who may be struggling to know how to get started on their sustainability journey. We commissioned 3VA and the Sustainable Business Partnership to facilitate the community [Climate Action Forum](#).

The forum will develop over 2021 to provide a space for the community and youth to engage with the climate change agenda and develop new local action and ownership of the problem as well as the solutions.

Residents (including young people), businesses and organisations can get involved by joining [here](#).

The Youth Voice

Young people are key to the reduction of greenhouse gas emissions in the longer term. They will inherit our legacy and live with the consequences of climate change. Working closely with young people now will help ensure that sustainability behaviours and climate awareness are taken forward into adulthood. We need to embrace their energy and enthusiasm and enable, rather than stifle, their ideas but they also need to see us act swiftly and decisively for their future.

The **East Sussex Youth Council** is the elected youth voice for East Sussex. It made 'protecting the environment' top of their list of priorities for 2020 mirroring the Youth Parliaments 'Protect our Future' campaign. There is also the **Green United Forum** and schools network. OVESCO have engaged with local schools to install solar panels and many have taken up the environmental challenge by seeking to make their schools more sustainable in many other ways.

Kings Academy in Ringmer is nationally recognised for its sustainability work and is an **Ashden Award** winner. The school generates 70% of its heat on site through a variety of measures including a biomass boiler and heat pumps. They have on-site solar panels and a wind turbine generating **25% of their electrical energy use**. Rainwater flushes the toilets and extensive insulation has been installed.

Most impressively **25%** of their students are actively engaged as **ECO Reps**.

In order to encourage engagement with the district's Climate Action Forum young people from Seaford, Lewes, Ringmer, Chailey and Peacehaven were brought together at the end of October 2020 to speak about how they wanted to address the climate emergency in the Lewes District Area at a facilitated youth specific forum. Some of these young people were also representatives of the East Sussex Youth Cabinet, Seaford Environmental Alliance, Home Schools Network and their own school and college climate action and sustainability groups. The group chose 'campaigning' as their preferred type of action and to focus this within schools and colleges in the area. They also decided to vote for a representative to feedback from the youth group into the wider Climate Action Forum.

Part 2

Why do we need a strategy?

Why do we need a strategy?

Overwhelming consensus has been gained through global and national research from the likes of the Intergovernmental Panel on Climate Change and the Met Office's UK Climate Projections to set in motion a policy framework that requires us to step up and take responsibility for our local emissions and environmental impacts.

We must act now to mitigate the impacts of a changing climate, to adapt and manage the risks to service provision, local communities, the natural environment, infrastructure and businesses whilst taking a grasp of the multitude of positive opportunities that the changes we need to make will offer us.

The council has a key role to play as a community leader and through the services we provide but we cannot do it alone. The strategy aims to act as a path directing us towards the net zero target and to bring together all the amazing work going on in our communities and expand upon it, to build resilience and adapt to our changing climate.

This strategy will:

- Set out a vision for Lewes District in 2030
- Set out how the council will act as a community leader and reduce its emissions to net zero carbon by 2030
- Provide a framework for action by the council and other partners to assist the district in becoming net zero carbon by 2030
- Enable best practice to be shared and replicated
- Bring together workstreams occurring across the district to monitor progress against the net zero carbon target.

This strategy will not:

- Be delivered by the council alone. The Evidence Base sets the path we need to take based on current evidence. Many of the things that need to happen cannot be delivered by the council but we can influence them. The Action Plan details the current actions we and others are taking and plan to take over the coming years in order to reduce emissions from our own operations and from the district. It is a live document and will be updated as plans are refined and progressed.
- Detail everything going on within the district or all the actions we need to take in future years. The council will monitor, review and update the strategy as required and formally once per year.

Policy Framework

The policy framework is set out on the following page – click through the links to find out more about each item – this isn't a comprehensive list but provides insight into major pieces of policy and how they link to our climate change and sustainability strategy.

UN Sustainable Development Goals

The Sustainable Development Goals (SDGs) are a set of 17 goals with 169 targets that were adopted by every country in the world in 2015. They set out a blueprint to achieve a better and more sustainable future for all by 2030. The goals are to be achieved by everyone everywhere and seek to make sure that 'No One is left behind'. They address the interconnected global challenges we face, including those related to poverty, inequality, climate, environmental degradation, prosperity, and peace and justice.

Lewes District Council would like to seek to achieve the UN goals in the same period as the net zero carbon target. Many actions within the climate change and sustainability action plan will help deliver the goals but we have not yet gone through a process of detailed analysis.

The table on the following page provides examples of how our 2030 net zero action areas (and their respective goals) align to the SDGs.

Developing the strategy

HIGH AMBITION PATHWAY: 2030 SUMMARY

By 2030, the emissions profile for Lewes is predicted to look very different from today. Concerted local actions can have a significant effect on district emissions, making reductions of around 65%.

Tackling residual emissions - closing the gap to carbon neutrality

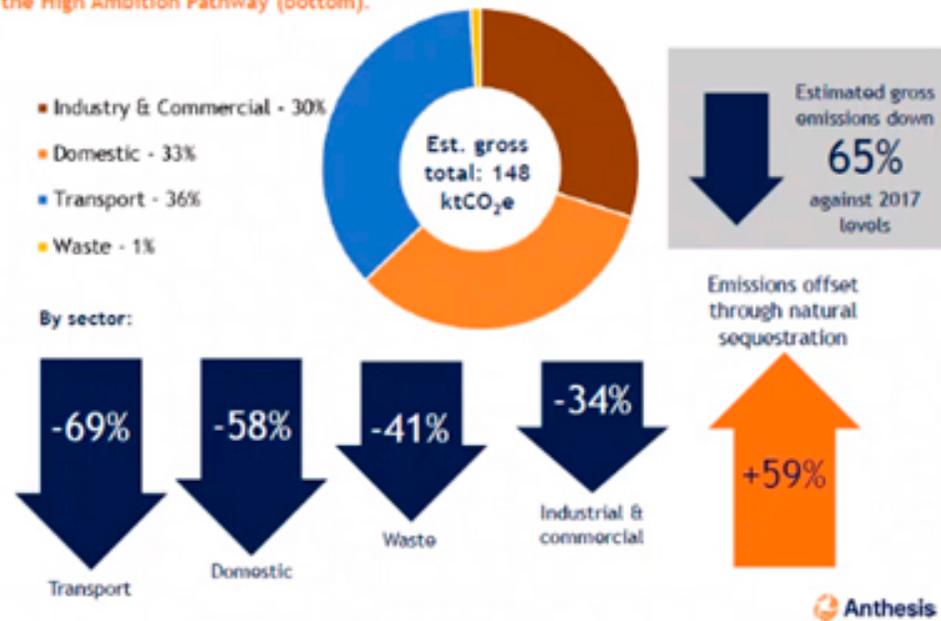

Despite the aggressive actions described, hard-to-remove emissions in industry and freight transport persist. Whilst emissions from the domestic and waste sectors are massively reduced, the scale of improvement is not enough to reach zero by 2030.

Offsetting strategies are recommended as a means of addressing these residual emissions.

Lewes District Council | Executive Summary

Adoption of the High Ambition Pathway interventions delivers emissions reductions of around **two-thirds** by 2030.

Figure iii: Estimated 2030 emissions profile (top). Emissions reductions in key sectors under the High Ambition Pathway (bottom).

Jones, Oliver

Thompson, Nathan

McDevitt, Millie

Richardson, Kate

Developing the strategy

The strategy has been developed over the period June to December 2020 during which time we engaged with around 140 individuals and organisations throughout the district.

Initial guidance was provided in 2019 by the setting up of the Climate Change Scrutiny Panel, a cross-party group that has fed into the development of the engagement plan and of the strategy goals and actions, and the Sustainability Expert Panels set up to provide the council with expert insight into developing the climate change strategy.

Experts include: individual experts in their field (eg. Planning and architecture); organisations such as the Sussex Wildlife Trust, University of Sussex, Environment Agency, NFU; and other councils such as East Sussex County Council.

A series of thematic workshops took place involving the 27 representatives on the Expert Panel, to review the draft Climate Change and Sustainability Framework.

The Council will continue to work with the group as a critical friend and will actively engage the group to deliver and progress the action plan.

The draft framework and goals were initially developed using an evidence base collated

from national research (such as the [UK Climate Projections](#)) and the locally specific emission baseline reports such as the district and council carbon baseline reports that were completed by July 2020 and can be found at www.lewes-eastbourne.gov.uk/climatechange

In August 2020 the council commenced the public engagement using the draft framework which ran to the end of October 2020. This coincided with the first virtual meeting of the Climate Action Forum which was also used to engage with the attendees on the draft framework.

The engagement work and responses to the survey has provided direction and specificity to the revised over-arching goals and provided confidence to the council that we are heading in the right direction with our science-based ambition.

The Evidence Base

The need for a clear strategic path and a prioritised action plan has required an evidence base to inform its production. The Strategy and its appendices bring together this evidence to enable the action we must undertake as a local authority to 'get our own house in order' as well as activity the council shall need to do in the wider district to enable others to work towards the district wide net zero target.

Global and national research is useful at a high level, with the UK Climate Projections [insert link] being of most use locally, but we required an in-depth district analysis, this has been provided in the form of 2 Anthesis reports 'Lewes District Council Carbon Emissions Analysis and Pathways' and the subsequent 'Agriculture and Land-Use' study.

We have also carried out a baseline report on council operations.

A summary of the projections and the district and council baselines can be found in this section of the strategy and the full baseline reports can be found at www.lewes-eastbourne.gov.uk/climatechange

Adapting to Climate Change

The district must become resilient to the effects of climate change through adaptation, for example by preventing homes from overheating, and preventing further increases in emissions which will make these effects worse (mitigation).

The latest [State of the UK Climate 2019](#) report shows several indicators consistent with the expected effects of a warming climate.

General climate change trends projected over UK land for the 21st century in UK Climate Projections 2018 are broadly consistent with earlier projections (2009) showing an increased chance of warmer, wetter winters and hotter, drier summers along with an increase in the frequency and intensity of extremes.

You can find out more about how climate change may affect you by using this interactive tool developed by the BBC using the Met Office Climate Projections data. Click [here](#) to access the tool.

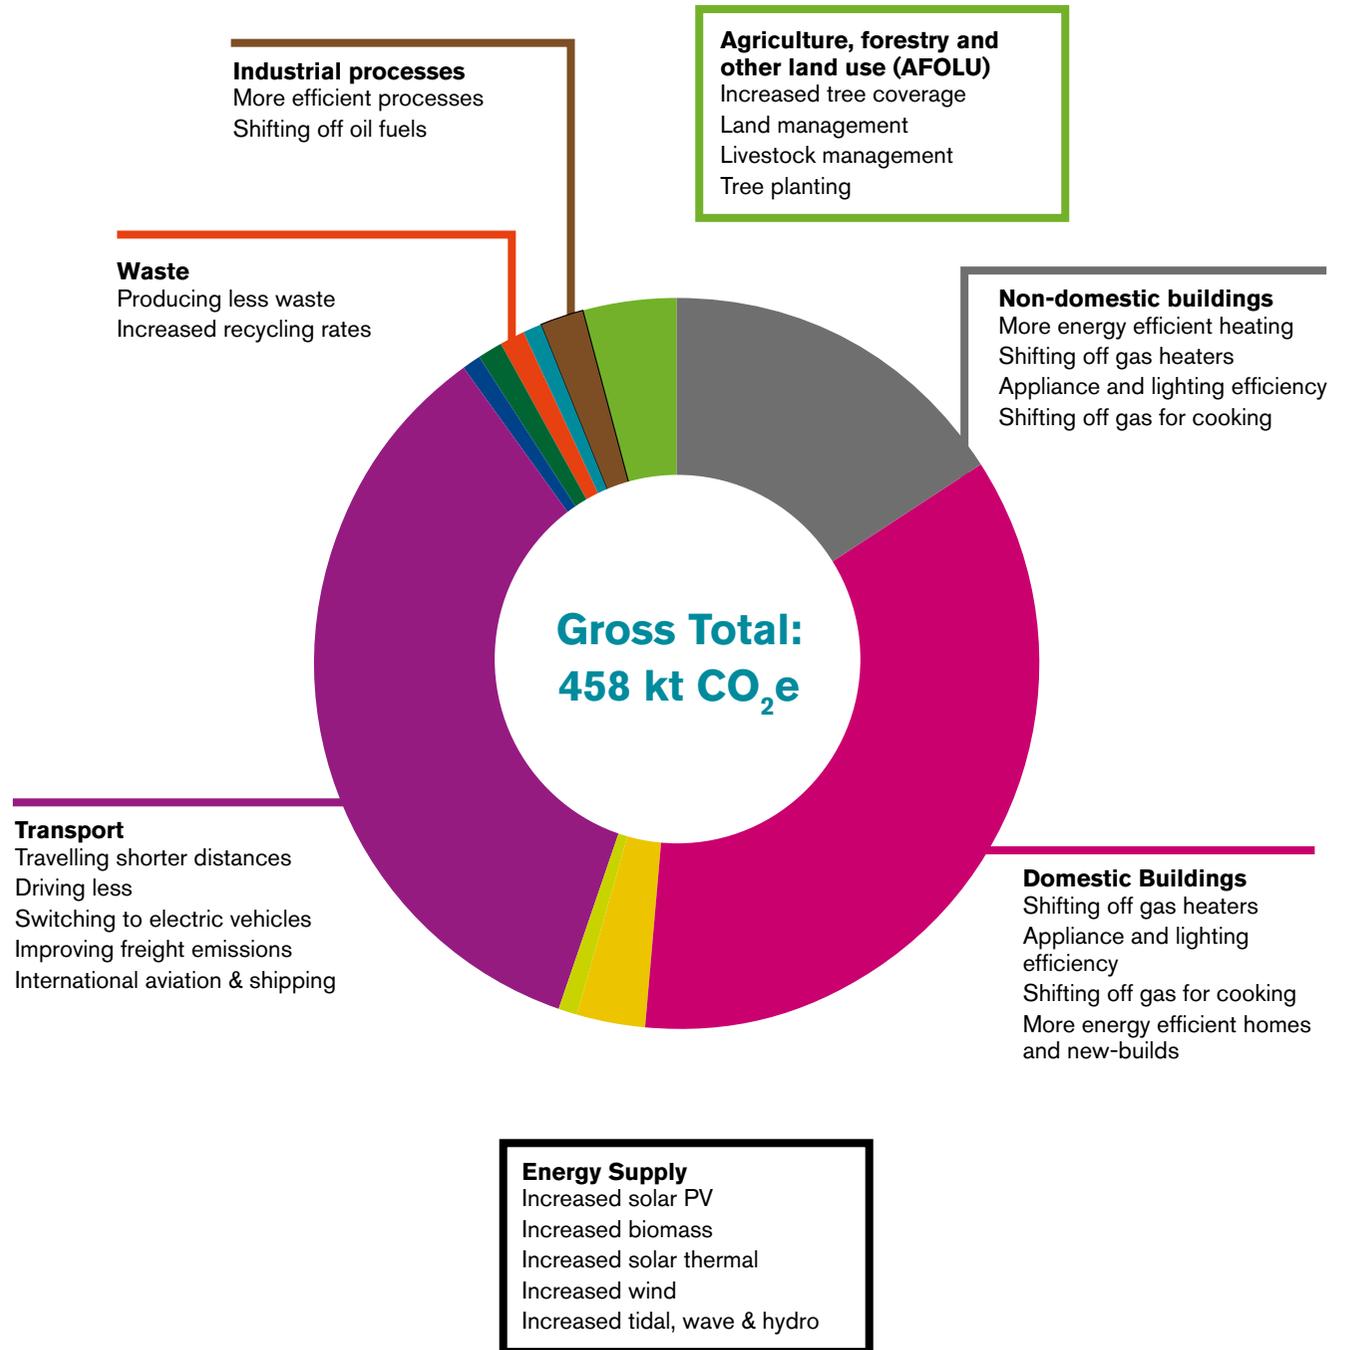

PHOTO © Sam Buckland
Sussex Wildlife Trust

The District Baseline

Anthesis uses the SCATTER local authority emissions inventory tool to define an emissions profile for Lewes district based on 2017 data. SCATTER stands for Setting City Area Targets and Trajectories for Emissions Reductions.

The doughnut chart below defines the baseline emission profile and a summary of the high-level measures modelled within SCATTER to tackle and reduce those emissions.

- Industrial & institutional buildings **16%**
- Residential buildings **36%**
- Commercial buildings & facilities **3%**
- Agricultural fuel use **1%**
- On-road transport **35%**
- Rail transport **1%**
- Off-road transport **<1%**
- Solid waste disposal **<1%**
- Wastewater **1%**
- Industrial processes **2%**
- Livestock **4%**

The District Pathway to Net Zero

This is a simplified summary of some large scale actions that have been modelled to meet our target based on current technology – for more information click [here](#) to read the full baseline report and the action plan.

NET ZERO
CARBON
BY 2030

The Council Baseline

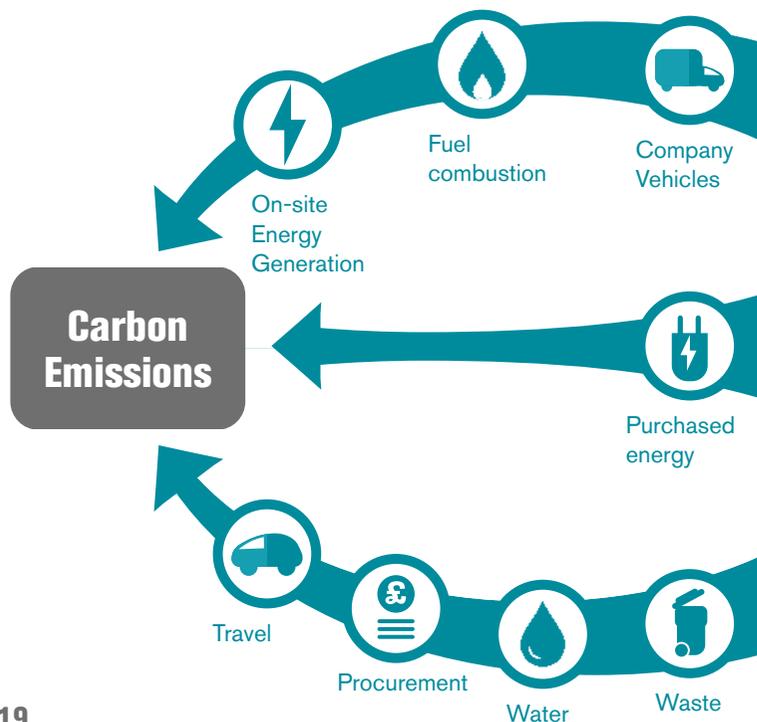

The Council's baseline is based on the Council's directly controllable consumption of gas, electricity and fuel; the baseline emissions for 2018/19 financial year are approximately 1,590 tonnes CO₂e (tCO₂e). This figure is included within the District wide emissions of 458,000 tCO₂e. As such the Council's baseline emissions account for just 0.3% of the overall footprint for the District.

Emissions are divided into three categories referred to as Scope 1, 2 and 3 as illustrated below.

Baseline emissions are reported as carbon dioxide equivalents (CO₂e) and are calculated using the Scope 1 and 2 emissions detailed in the table below.

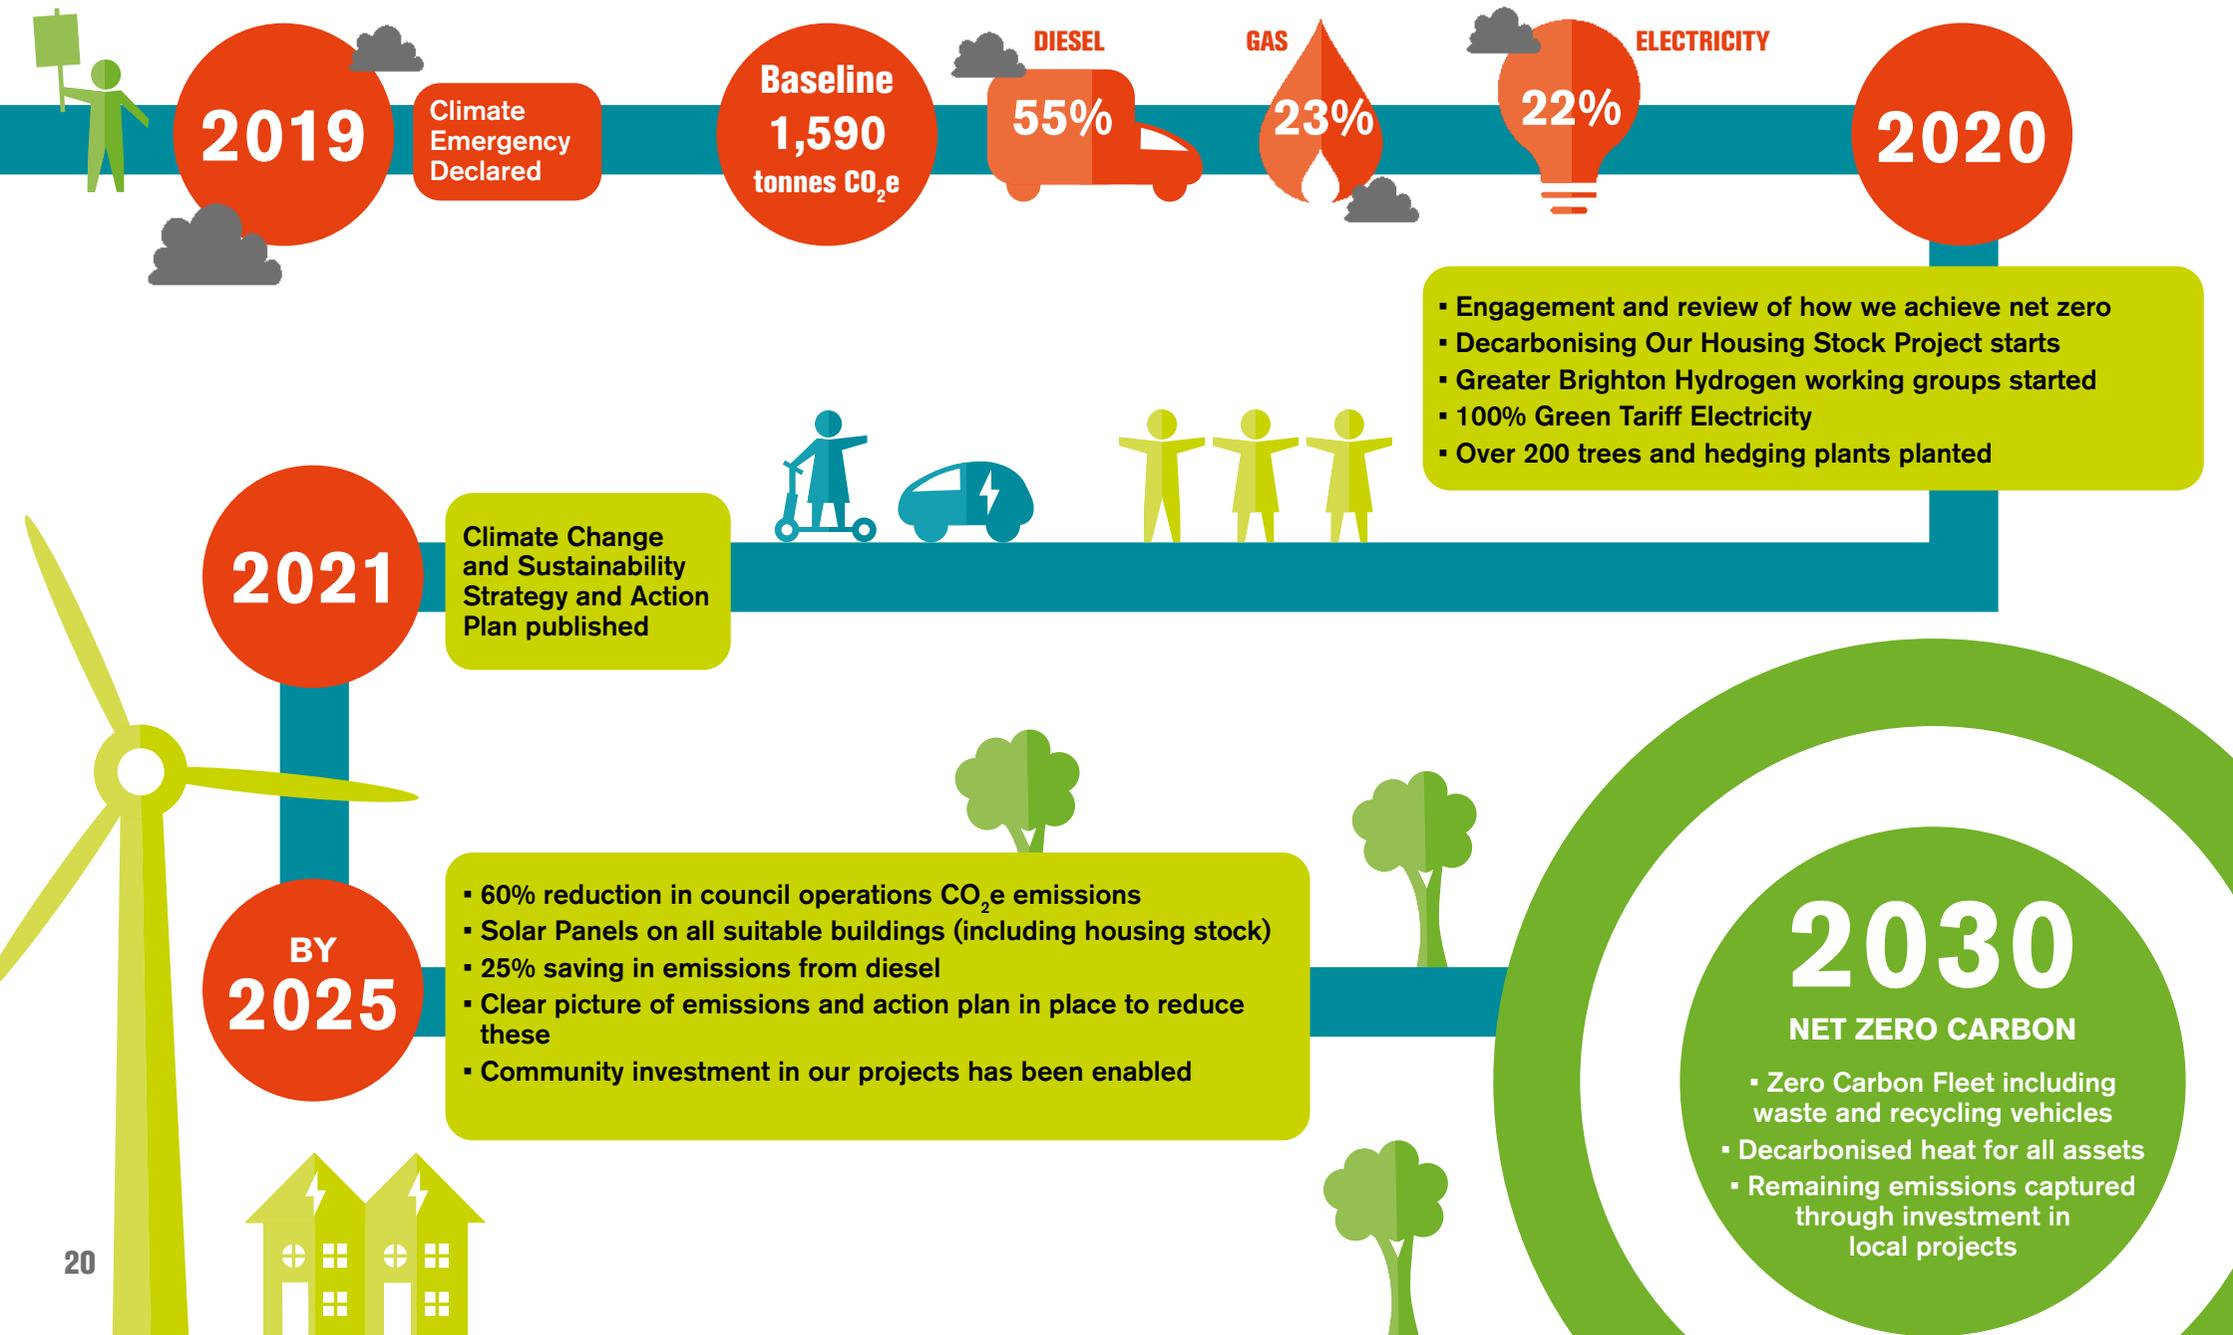

Scope 3 emissions are not something we directly control, they occur when we buy a product or service and the emissions are produced somewhere else. They can be more

difficult than scope 1 and 2 to determine accurately. We will report these emissions as our data collecting procedures improve and where we feel the figures will be accurate. Our ability to reduce emissions from scope 3 sources will also be more difficult but we will work to report them and will clarify those where we have influence or not (for example- our emissions from water use is within our sphere of influence, we can try to reduce consumption once we know what we consume accurately)

| Category | Description | Data used in this analysis |
|----------------|--|--|
| SCOPE 1 | Direct emissions from sources owned or controlled by Lewes District Council | Metered gas data (for buildings where the Council pay the gas bills) Litres of fuel consumed for fleet vehicles |
| SCOPE 2 | Indirect emissions from the generation of energy purchased by Lewes District Council | Metered electricity data (for buildings where the Council pay the electricity bills) |
| SCOPE 3 | Indirect emissions that result from other activities that occur in the value chain, either upstream or downstream | Not reported this year |

The Council's Pathway to Net Zero

Part 4 – The Strategic Action Areas

Part 4 - The Strategic Action Areas

The 7 action areas set out in this Strategy provide the framework for the action plan through which we will focus our efforts in reducing emissions and improving climate resilience.

Some areas cross over, for example the built environment will link with aspects of sustainable transport, so some actions may impact on more than one area.

Each section provides a one-page overview with some facts on the current situation and the 2030 strategic goals. The second page provides a summary of the targets for the area along with key actions happening now or in the near term and the third page highlights a particular case study.

For more information and detail on the actions happening within each theme area please see the full Action Plan in section 6.

In developing the strategy, it became clear that some issues ran throughout all our action areas. These cross-cutting themes are:

Education & training

- Awareness raising and communication with residents- to enable and empower
- Education and training of the next generation
- Upskilling of existing trades to enable the transition to a low carbon economy
- Ongoing upskilling of council officers

Funding

- Developing community investment mechanisms to enable local sustainability and climate initiatives.
- Support of community initiatives by the council to provide confidence to investors/donors and provide oversight on project delivery and carbon savings.

Evidence and targets

- Good quality and reliable data and evidence is needed to back up our decision making and action prioritisation.
- Data and targets will need collating and updating- we need to ensure we are not duplicating the work of others or creating unnecessary work.

Planning policy and building control

- Strengthen planning policy in our new local plan and through guidance for, and early conversations with, developers.

Supporting the action of others

- Obviously the council cannot deliver a net zero district alone but the strategy can support partnership working and the work of others across all action areas.

Energy and the Built Environment

Energy use is the largest source of emissions from our district. This action area covers all the energy consumed by everyone within our district with regards to heating and powering their homes and businesses. It also covers the councils own work to make its buildings net zero carbon and the things we can do to directly influence others such as through planning policy and our housing stock.

Key Council actions for 2021/22

- Decarbonising Our Housing Stock project - developing and carrying out energy efficiency and low carbon pilot studies so we can plan a way to decarbonise all of our housing by 2030
- Complete the Asset Review for our non-housing buildings and land- this will allow us to determine our route to net zero buildings and make the most of our other assets for the benefit of the whole district
- Work with the Greater Brighton Economic Board to develop hydrogen hubs
- Support investment in local renewable energy projects
- Support private homeowners and renters in accessing energy efficiency advice and grants such as through Warmer Sussex and the Government Green Homes Grant scheme

Key actions happening in the district:

- Solar schools - Regional work with community energy companies and East Sussex County Council to put solar panels on schools
- Projects to get rural villages off oil for heating and decarbonise electricity
- CommuniHeat Zero Carbon Village - Community Energy company OVESCO in conjunction with UKPN & Buro Happold and Community Energy South are producing a masterplan to decarbonise Barcombe by 2030
- Net Zero Firle - Community energy company BHESCO is leading this project to install a zero carbon micro grid for heat and power in this off-gas village

Spotlight on: Ovesco

OVESCO is the district's local community run energy services company enabling local investment in solar generation projects to reduce our dependency on imported energy.

So far they have built over 5.25MW including projects on Harveys Depot, Priory School, Kings Academy, Brickyard Farm, Barcombe Nurseries and Landport Community Centre amongst others. **OVESCO** are partners in wider funding bids including Ouse Valley CARES and Communiheat Net zero carbon village at Barcombe.

Sustainable travel and air quality

On-road transport is the second largest source of emissions in the district but it is something that the district council can only influence indirectly. We will facilitate change where we can by working with the community and East Sussex County Council to reduce the need to travel in the first instance and to provide active and low carbon travel options regardless of where in the district you live or travel to.

We have 2 Air Quality Management Areas – one in Lewes town and one in Newhaven. Both these areas have levels of nitrogen dioxide likely to exceed national air quality objectives. Transport is the main reason for the poor air quality.

2030
GOALS

We will have improved air quality and reduced carbon emissions by:

1

Reducing reliance on car and need for personal car ownership

2

Encouraging a more sustainable and low carbon district wide transport network

3

We have worked with ESCC to promote and develop sustainable travel across the district

NEW AIR QUALITY
ACTION PLANS
FOR LEWES AND
NEWHAVEN BY END
2021

Key Council actions for 2021/22

- Production of the fleet pathway to be zero carbon by 2030
- Assess all car parks for electric vehicle charge points and start installations
- Develop a path towards a low carbon taxi fleet
- New Air Quality Action Plans to be produced for Lewes and Newhaven

Key actions happening in the district:

- Working with East Sussex County Council to improve rural public transport
- Work with East Sussex County Council to deliver the new Local Cycling and Walking Infrastructure Plan
- Decarbonisation of public transport through use of hydrogen buses and delivering solar power direct to the railway through the Riding Sunbeams project
- Development of Hydrogen fueling hubs

Spotlight on: The Lewes Electric Car Show

The Lewes Electric Car Show has run now for 2 years thanks to Transition Town Lewes, OVESCO, Sussex EV Group and hosts Harvey's Brewery.

800 people visited the last show in 2019 which featured 21 hybrid and fully-electric cars and their owners plus a range of electric motorbikes and mopeds. The show has provided an opportunity for visitors to talk to real-life owners as well as EV experts on the realities of going electric.

Transition Town Lewes have put together some useful information on the show and EV's on their website [here](#).

Transition Town Lewes

Biodiversity

The land (soil and plants) within the district currently captures 23.9 kt CO₂e per year. Biological diversity is essential and intrinsically linked to every part of our health, livelihoods and our future wellbeing. Healthy and resilient societies depend on giving nature the space it needs yet globally wildlife populations have reduced by 60% and insects by 75% since the 1970's. This action area includes work to improve our natural environment and capture carbon through nature based projects.

50%

OF THE DISTRICT IS WITHIN THE SOUTH DOWNS NATIONAL PARK

2030 GOALS

1

All developments maximise the opportunities for well considered net gains in biodiversity

2

We have increased biodiversity on Council owned and managed landholdings

3

We have engaged and enabled community led nature-based projects and we are involved in partnerships that promote natural capital across the district, including the coast and sea

TO IMPLEMENT
A CARBON CAPTURE
FUND NO LATER
THAN
2025

Key Council actions for 2021/22

- Adopt a Biodiversity Strategy and Action Plan
- Produce a Biodiversity Net Gain Technical Advice Note to advise developers
- Carry out biodiversity training for Officers
- Develop a way of funding community nature based projects
- Develop a method to measure the carbon capture of nature based projects

Key actions happening in the district:

- Partnership delivery of the Local Nature Partnerships 'Sussex Natural Capital Investment Strategy'
- Ouse Valley Cares – development of projects for a National Lottery Grant bid led by the South Downs National Park
- Changing Chalk- Partnership bid led by the National Trust to connect people to nature and address challenges faced by the South Downs

Spotlight on: Lewes Cemetery

Much of Lewes Cemetery is a Designated Local Wildlife Site, recognised as a natural wildflower meadow with many special and exceptionally valuable native plants such as the beautiful purple triangles of the Pyramidal Orchids, the vibrant yellows of the Mouse-ear Hawkweeds, and the hue of delicate white and yellow Bedstraws.

Lewes District Council has changed the management regime in parts of the Cemetery allowing 3.5 acres of traditionally mown grass to become a wildflower meadow. Surveys have been undertaken by the local group Wildflower Lewes and they have also undertaken wildflower plug planting.

To understand the importance of the bee and wasp populations in the cemetery, a series of visits was undertaken throughout summer and early autumn 2020 by James Power. These visits, which will only represent a snapshot of what is present, confirmed that the cemetery supports a good assemblage, including four nationally scarce species. In total, 72 bees and wasps were recorded, representing 34 species, 15% of the total number found in Sussex.

In November 2020 eighteen trees were planted around the perimeter of the Cemetery with the help and funding from the Friends of Lewes. Additionally in early 2021, with funding through the South Downs National Park Authority, works will be undertaken to create a hedgerow on the southern boundary and an area of disturbed ground will be returned to a chalk grassland wildflower meadow.

We are looking to manage the whole of the Cemetery more sensitively to wildlife; maintaining our pesticide free status and monitoring the condition of the wildflower populations to inform future cutting regimes.

Photo courtesy of Wilf Power

Agriculture and food

Emissions from agriculture account for more than 37kt CO₂e per year and are about 8% of the districts total emissions - this figure is slightly higher than is reported in our baseline report as we commissioned a further more detailed study into agricultural and land use that can be found [here](#)

About 75% of these emissions are from livestock with the remaining 25% from fertilizer application and are typically nitrous oxide emissions

The Council will work with landowners and others such as the National Farmers Union and Sussex Wildlife Trust to work toward more sustainable farming methods and we will develop the local food economy.

2030
GOALS

We will work in partnership with others to:

1

Educate and enable residents to access affordable, local and seasonal food through supporting opportunities for local production and distribution

2

Implement a district and Sussex wide food strategy

3

Enable and support local food growing using regenerative farming methods

DRAFT STRATEGY
FOR A FOOD
PARTNERSHIP BY

2022

Key Council actions for 2021/22

- Work with council tenants to enable food growing
- Identify possible land that could be made available for food growing
- Work with existing farmers/local food markets to expand on good practice and access new communities
- Work with district and regional partners on food networks and partnerships

Key actions happening in the district:

- Development of a district-wide food partnership
- Development of a food systems map
- Encouragement of nature friendly farming through the South East Downs Farm Cluster

Spotlight on: Lewes Friday Food Market

Lewes Friday Food Market grew from an idea developed by volunteers from the Transition Town Lewes Food Group and has developed to be run by the Lewes Local Community Interest Company as a not-for-profit initiative. It has main aims of:

- Developing and supporting sustainable local food systems and culture
- Making it easier for people to buy good quality, healthy, seasonal food
- Supporting and providing a platform for small local food producers and growers
- Reducing the use of single use plastic
- Supporting distribution methods which reduce carbon emissions
- Supporting food related community initiatives and the local economy

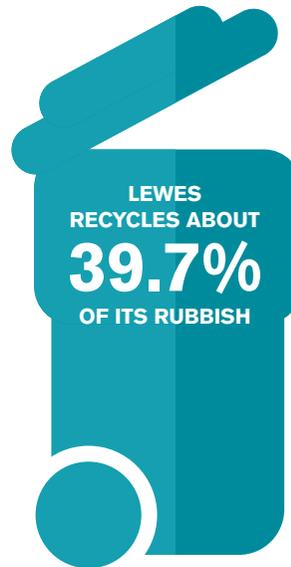

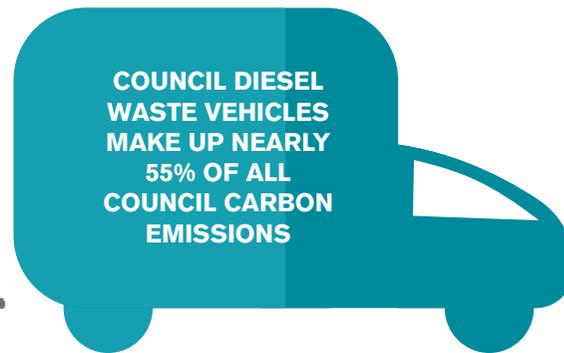

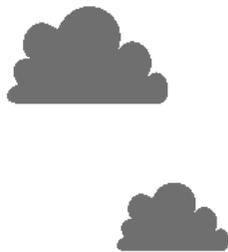

Reducing Emissions from Waste

To reduce emissions from the waste we generate we must work to reduce the districts waste first, then increase the amount we recycle. The council collects around 278kg of waste per person per year and that which is not recycled is incinerated.

Within this action area we include the emissions from our waste collection vehicles, this source of emissions is over half of the total council carbon baseline. The vehicles are currently run on diesel which contains other pollutants as well that lead to poor air quality and pollution.

BY
2025

Key Council actions for 2021/22

- Undertake the waste fleet review
- Eliminate use of unnecessary paper within Democratic Services
- Prepare a communications plan to encourage Reduce, Re-use, Recycle
- Develop and take forward new planning guidance to reduce construction waste

Key actions happening in the district:

- Local REFILL campaigns to promote access to water and reduce plastic bottles [click [here](#)]
- Plastic Free initiatives [click [here](#)]
- East Sussex County Council review of the Waste and Mineral Local Plan (next consultation due 2021)

Spotlight on: Refill Seaford & Newhaven

Refill Seaford and Newhaven

In January 2018 a group of local people decided to take action, having completed beach and beauty spot litter picks in the past we decided to set up a Facebook Group to raise awareness and to encourage people to reduce single-use plastic from their lives.

The initial response has been encouraging from a variety of businesses, now we want to spread the word wider and involve more and more local organisations and businesses.

The official launch was at Frankie's Beach café on Seaford Esplanade on 1st September 2018 mainly sponsored by South East Water and assisted by some great local volunteers.

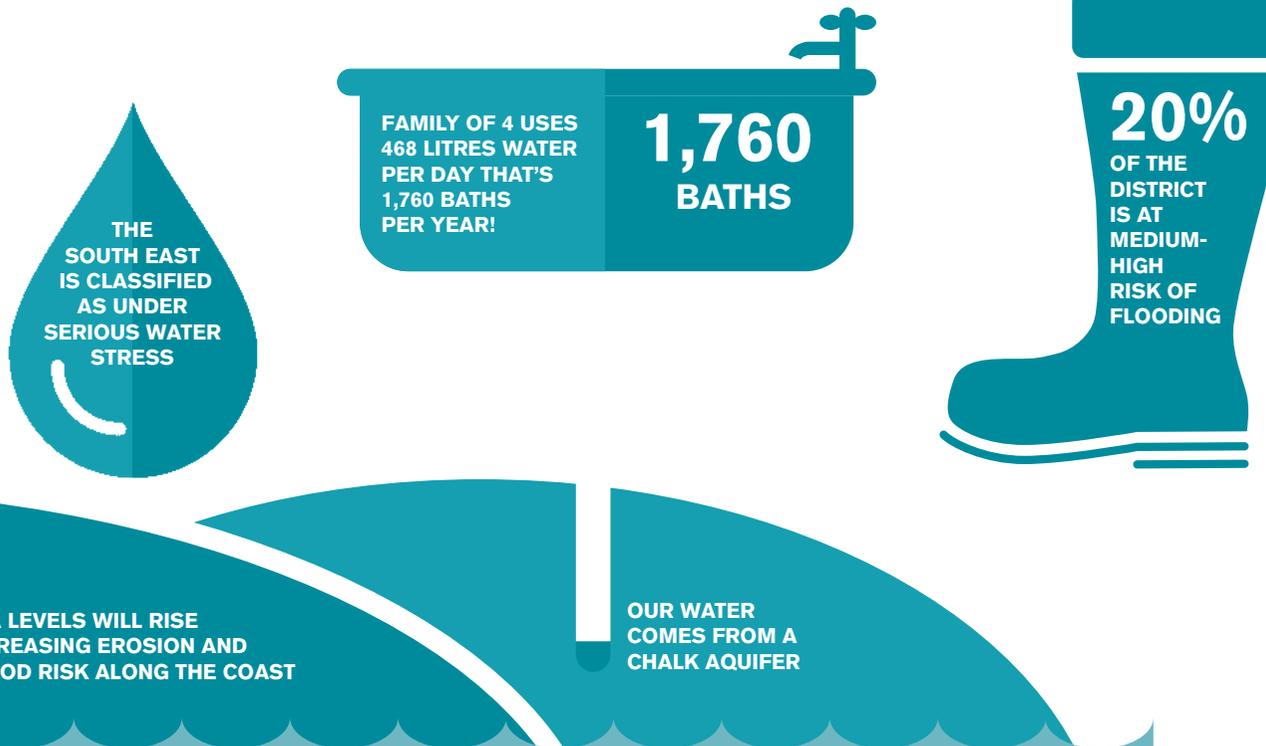

This action area covers the full spectrum of water use and impacts within the district. It covers water consumption as well as flooding from rivers, surface water and the sea and also includes coastal erosion.

We expect to see warmer and drier summers increase water consumption whilst milder and wetter winters will likely see us experience more flooding. Severe rainfall events are likely to increase throughout the year further increasing the risk of flooding.

Whether delivering coastal erosion or flood protection the mechanisms for delivery is complex and the works themselves are expensive, delivered at locations where are inherently dangerous. There is no duty to deliver flood or coastal protection, the Environment Agency and local authorities operate under permissive powers. Partnership working is essential and complex.

2030 GOALS

We will work in partnership with others to achieve:

- 1 Reduced water consumption in the district; conserved and protected our water resources, including our aquifer
- 2 Well managed and protected waterways and coastal areas that benefit residents and the natural environment
- 3 Communities that are resilient against flooding and coastal erosion

Key Council actions for 2021/22

- Work in partnership with the Environment Agency to explore the options viable to manage the risks posed by the undefended cliffs at The Esplanade, Telscombe Cliffs.
- Host coastal management workshop
- Prepare communications (in partnership with water companies) with residents on reducing domestic water use
- Work with partners to develop comms and possible incentives for developers to reduce water consumption and mitigate flood risk
- Produce guidance for developers targeting 100 litres per day in new builds

Key actions happening in the district:

- Expansion of the successful Sussex Flow Initiative to promote natural flood management
- Southern Water's Target 100 campaign to reduce water use
- Southern Water's domestic water efficiency audits
- The Aquifer Partnership will continue to collate knowledge and understanding of our aquifer in order to help us all protect it.

Spotlight on: Sussex Flow Initiative

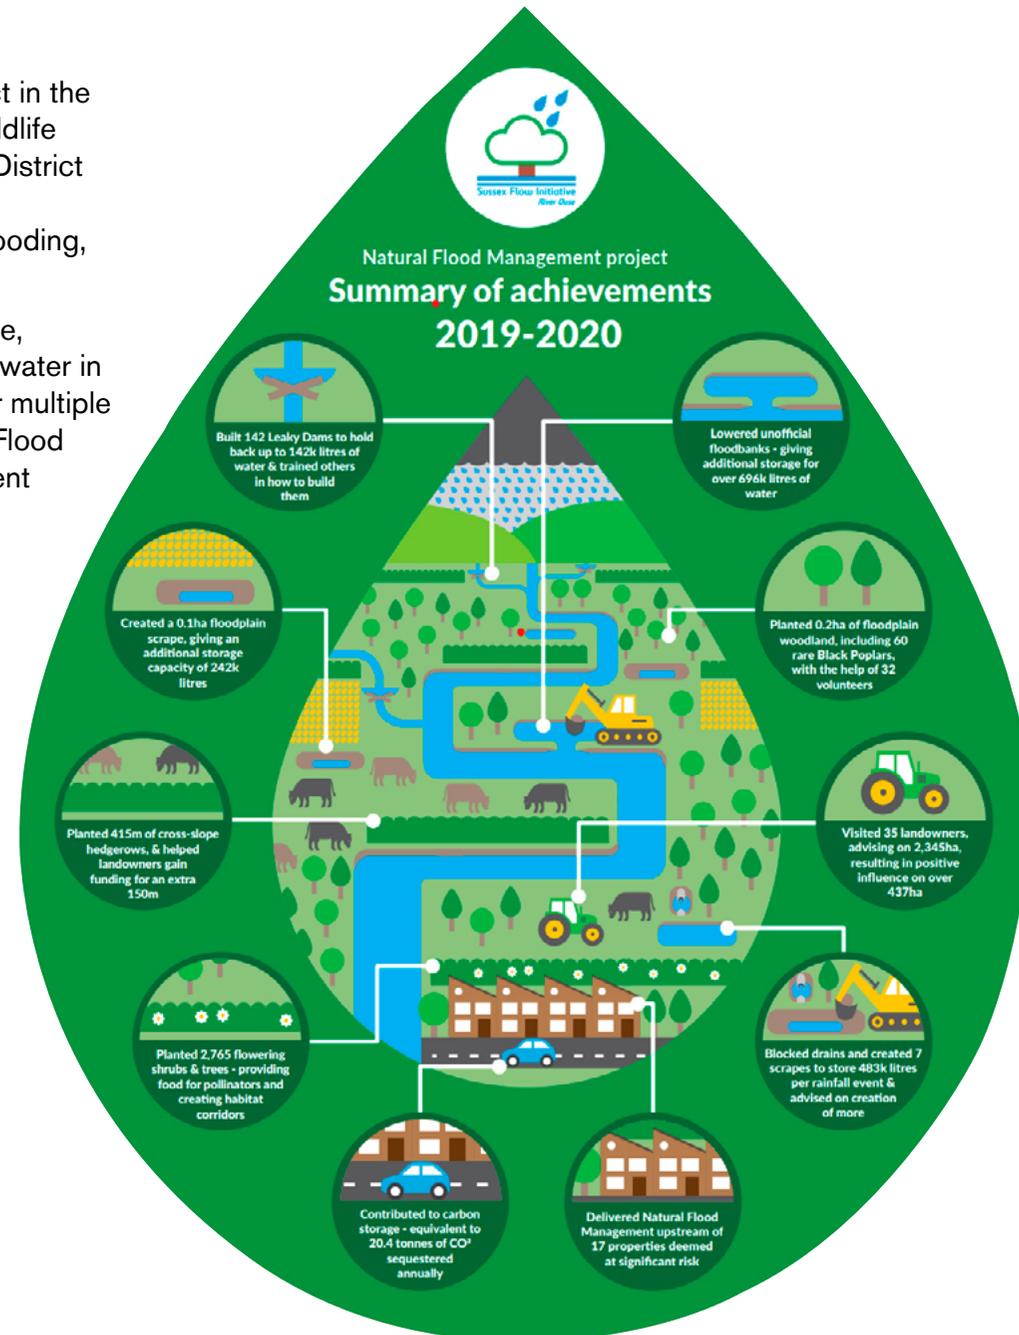

Sussex Flow Initiative

Sussex Flow Initiative (SFI) is a natural flood management project in the River Ouse catchment, and is a partnership between Sussex Wildlife Trust, the Woodland Trust, the Environment Agency and Lewes District Council. The project was originally set up to see if Natural Flood Management (NFM) measures can create positive benefits for flooding, the environment and society in a lowland setting.

SFI works with landowners, local people and others to investigate, promote and create natural features designed to slow and store water in the landscape and to help reduce flood peaks. We aim to deliver multiple benefits for people and wildlife, as well as to show how Natural Flood Management can be used to support traditional flood management methods to help reduce flooding.

Our Natural Flood Management work includes:

- Introducing Large Woody Debris – leaky dams
- Ditch blocking
- Flood storage areas
- Recreating and restoring washland meadows
- Managing and creating riparian corridors
- Cross-slope hedge planting
- Riparian tree planting (along riverbanks)
- Woodland planting and management
- Soil management to improve capacity to absorb water (infiltration)

The Community wealth building (CWB) approach sits alongside sustainability as the two key policy drivers for the council. As an anchor institution the council can use its spending power and influence to drive investment into the local economy enabling a green economic recovery and local job creation and retention.

The Circular economy seeks to keep resources in use for as long as possible then recover and regenerate the materials at the end of each service life – it links with the CWB agenda in that we can generate local employment and wealth by doing this within our community – re-use networks are a good example of this.

This action area links with many of the other areas within this strategy through things such as decarbonising our housing and creation of community investment vehicles.

1

The Council has a sustainable procurement policy that facilitates local supply chains and encourages a circular economy

2

The council has enabled local re-use networks

3

Investment has been made into the local urban, coastal and rural economies increasing local employment opportunities and reducing income inequality

4

Local skills, supply chains and employment opportunities are improved as a result of our partnerships with East Sussex College Group, public sector organisations, social enterprises, cooperative businesses, as well as other forms of business, particularly focussing on clean and green technologies

Circular Economy and Community Wealth

The Council commissioned the Centre for Local Economic Strategies (CLES) to undertake a diagnostic study and consequently offer recommendations to the council on how it could deliver a CWB based approach to its work. This study was undertaken during the summer of 2020 and involved in-depth interviews with a range of council staff and partners, as well as consideration of various council policy and strategy documentation.

'Re-imagining Lewes District Action Plan' was informed by the final report and will develop 5 pillars of Community Wealth Building using the power and influence of the Council as an anchor institution with a procurement spend of over £7.5 million per year to build a platform for greater local and community ownership of the economy whilst building back a greener post-COVID economy.

Key Council actions for 2021/22

- Deliver the Reimagining Lewes District Action Plan
- Mobilise a district wide approach to develop the green economy
- Analyse procurement and commissioning spend
- Develop a localised social value framework
- Deliver the Net Zero Innovation Fund project – Alternative finance models

Key actions happening in the district:

- Team East Sussex Plan- 'think local, act local' embedded as key mission to focus procurement on local providers.
- Greater Brighton Economic Board 3 pillar approach to recovery of economic, environmental and social resilience
- Set up of Lewes District Anchor Network

Spotlight on: Locally constructed social housing

A new development of highly sustainable council homes in Newhaven has been completed during 2020. The 13 modular flats in Fort Road incorporate a host of eco-friendly and sustainable features, including the latest solar panels that will feed energy into hi-tech batteries, effectively taking the homes 'off-grid' for up to three months of the year.

The two-bedroom and one-bedroom apartments have been built by local employer Boutique Modern, a specialist manufacturer of modular homes. The firm designs and builds the properties in their local factory in Newhaven before moving them to the site for installation. 60% of the workforce on this project came from the local college.

Part 5

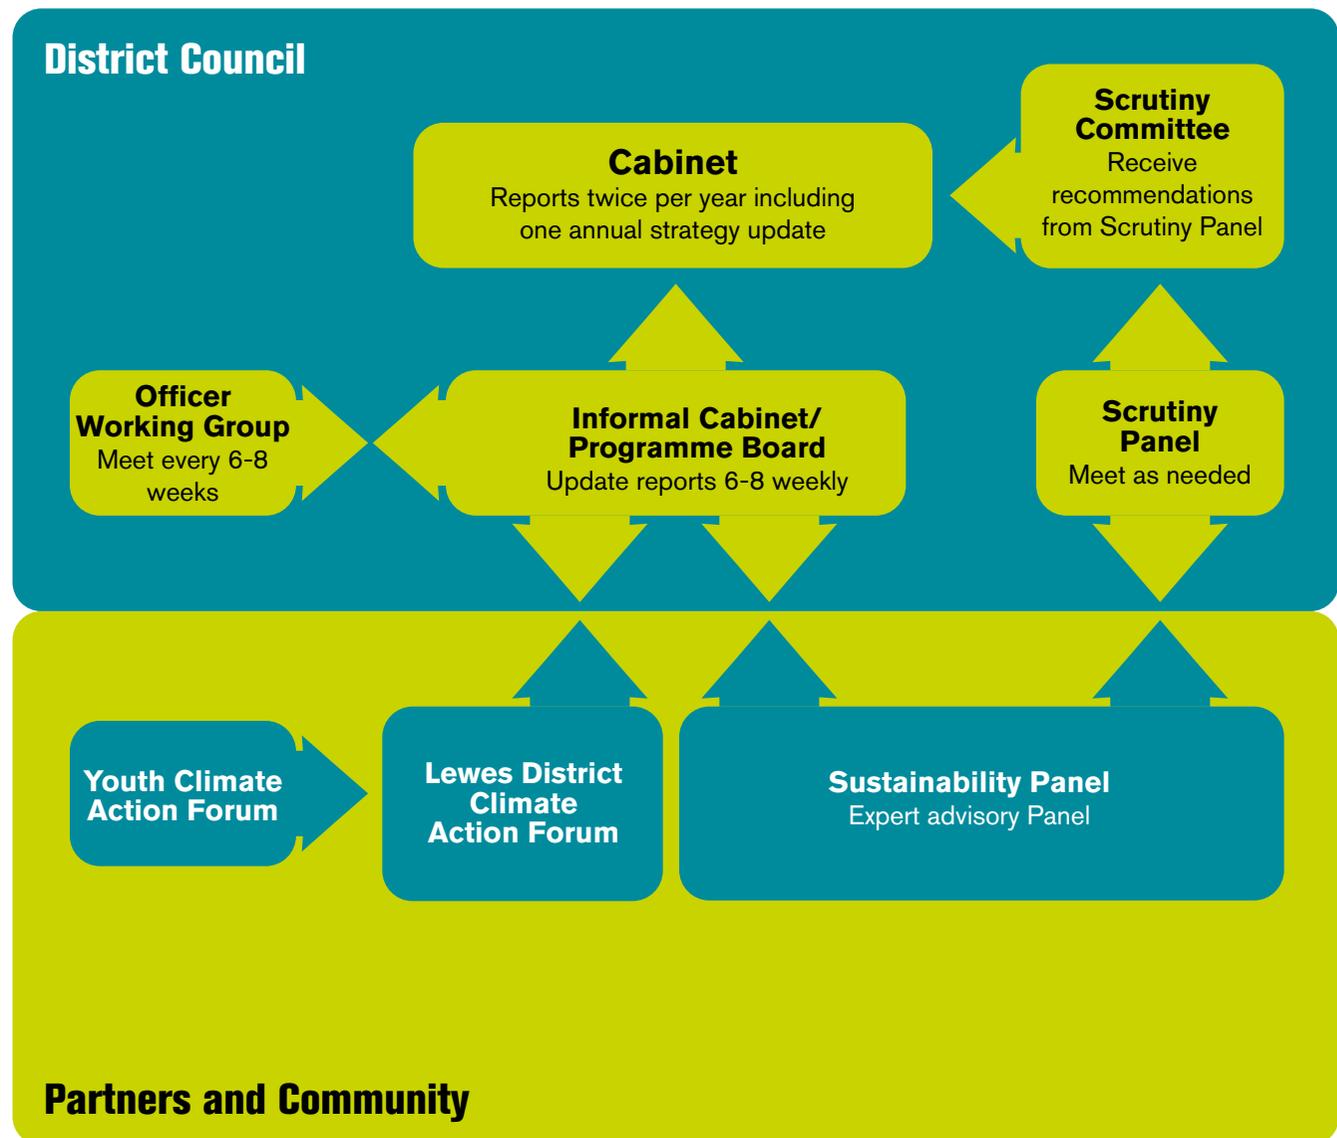

Delivering the strategy

Delivering the Strategy

The council acknowledges that some areas of the action plan are less developed than others and some workstreams will evolve over time as we work out the best solutions. We also appreciate the amount of time that can be spent on monitoring and reporting to the detriment of project delivery.

To ensure the action plan has appropriate monitoring and oversight at a senior level within the council the strategy will be overseen as follows:

Tackling Residual Emissions

In order to achieve the net zero carbon goal it is expected that the Council will have to carry out some degree of offsetting.

Offsetting is where we pay an amount of money towards projects that reduce carbon emissions somewhere else to the value of the emissions we are still generating.

We are clear that direct action to reduce consumption and emissions is our priority.

'Offsetting' will be considered only as a last resort when no other option exists.

There was clear direction from the draft framework engagement that locally-based projects should be considered before anything out of boundary (called 'Insetting'). It was generally accepted that due to cost the council should not be expected to offset emissions outside of its baseline (scope 3) but that the council should show clear reductions in these indirect emissions to 2030.

The council has committed to invest in projects to capture the residual emissions from its own operations (direct scope 1 & scope 2 sources) by 2030 and will assess the cost of including known scope 3.

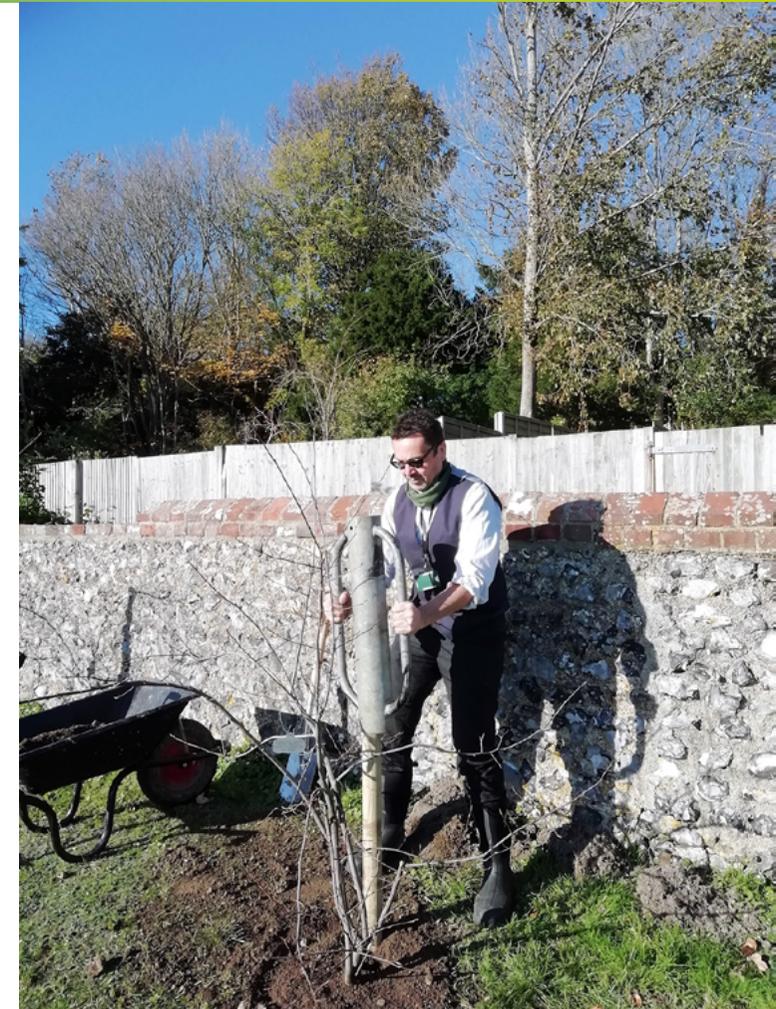

We will explore opportunities for projects that capture carbon either through natural carbon sequestration (such as tree planting) or through technological innovation (such as investing in local solar power).

We will research and develop the methodology we could use for primarily local, but possibly regional projects to meet any council residual emissions by 2030.

We will use the opportunity provided to us by the Net Zero Innovation Fund to investigate the potential to **enable community investment** in these or similar projects. This may be in the form of some kind of **council backed community bond** or a **donation-based community fund**, or a combination of the two.

These alternative funding mechanisms will supplement other available funding streams.

It is possible that regional work (such as that by Ouse Valley CARES and the Sussex Local Nature Partnership) on this subject may offer alternative or complimentary models of tackling residual emissions.

ABOVE Planting trees at Lewes Cemetery. 27 trees were planted in November 2020 as part of a joint Lewes Urban Arboretum, (Trees Committee of Friends of Lewes), and LDC project to increase biodiversity at Lewes Cemetery - which is already a Local Wildlife Site.

Part 6

The Action Plan and Sustainability Indicators

The action plan details the actions underway and planned to start to address the strategic challenges and goals set out in this strategy. The action plan is a live document managed by the internal council Officer Working Group and the Strategy & Partnership Lead-Sustainability.

The plan will be updated and published annually in September.

Alongside this plan sits a suite of indicators. Those that can be reported now have been but some are still in development and depend on the ability to get baseline data. Finalising the indicators will be a key task for inclusion in the 2021 update report.

The Action Plan 2021

TIMEFRAMES

| | |

| Short | 2021-2022 |
| Medium | 2023-2026 |
| Long | 2027-2030 |

| Action reference | ACTION | OUTCOME | ACTION OWNERS (note: the Cabinet Member for Sustainability has oversight of all actions) | TIMEFRAME | RESOURCES |
|------------------|--------|---------|--|-----------|-----------|
|------------------|--------|---------|--|-----------|-----------|

1. Energy & the built environment

Actions by the council to enable the District to become net zero carbon by 2030

| | | | | | | | |
|----|--|--|---|------------|-------------|-----------|---|
| E1 | Complete social housing stock condition surveys | Provides baseline information to enable retrofit and long term planning | Director of Planning and Regeneration & Cabinet Member for Housing | Jul-21 | | | Can be delivered using existing resources |
| E2 | Develop and deliver the project plan for the 'Decarbonising Our Housing Stock (DOHS)' project in conjunction with other stock holding authorities *January 2021- leaders meeting to establish extent of initial collaboration *Procurement routes to be established 2021 *Determine initial pilot projects 2021 | Best value is achieved through collaborative working, best solutions are determined and method is agreed to deploy retrofit measures, initially as pilots with a plan developed for roll out of appropriate solutions across the portfolio | Director of Planning and Regeneration & Cabinet Members for Housing, Communities & Customers and Sustainability | Short Term | | | £500k allocated from HRA |
| E3 | Develop and deliver a project plan to decarbonise all social housing based on findings and experience of the DOHS project (action E3) | All social housing is as energy efficient as it can be and carbon emissions are reduced as far as practicably possible | Director of Planning and Regeneration & Cabinet Members for Housing and Sustainability | | Medium Term | Long Term | Delivery costs to be determined once plan is prepared |
| E4 | Implement the actions defined in the Lewes Housing Strategy TBA | Housing standards in the rented sector improve | Director of Planning and Regeneration & Cabinet Member for Housing | Short Term | Medium Term | | Can be delivered using existing resources |
| E5 | Explore opportunities with Southern Water on capturing and using heat from waste water | Low carbon heat source enabled | Director of Planning and Regeneration & Cabinet Members for Planning & Infrastructure and Sustainability | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| E6 | Support and progress development of hydrogen hubs | Enable and develop a clean hydrogen economy for transport and heating | Director of Planning and Regeneration & Cabinet Members for Planning & Infrastructure and Sustainability | Short Term | Medium Term | | Can be delivered using existing resources |

| | | | | | | | |
|------------|--|--|--|------------|-------------|-----------|---|
| E7 | Enable and invest in community energy schemes where this is financially viable | Community energy schemes are supported to deliver projects | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure and Sustainability | Short Term | Medium Term | Long Term | Project specific |
| E8 | Introduce new sustainability Technical Advice Notes for developers (February 2021)- subsequently investigate potential for a more indepth Sustainable Design guide for developers that could link to circular economy work | Developers are advised as to expectations for new development and can easily access information on how to design for sustainability | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | Short Term | | | Can be delivered using existing resources |
| E9 | Develop an ongoing programme of awareness raising and promotion of energy efficiency initiatives, especially in fuel poor and hard to reach communities | Educate and raise awareness, those most vulnerable benefit from energy efficiency advice and measures | Director of Planning and Regeneration & Cabinet Member for Communities & Customers | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| E10 | Develop council web pages on sustainability and air quality to enable visitors to the web pages to better engage and understand the council's aspirations thereby increasing web traffic and raising public awareness. | Educate and raise awareness. | Director of Planning and Regeneration & Cabinet Member for Communities & Customers | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| E11 | Develop comprehensive training and guidance for staff on climate change and carbon reduction. Also specific training to ensure decisions properly take into account the carbon emission implications | All staff will improve their environmental awareness to enable carbon reductions in their work and private life. It will be clear to Councillors, officers and the public the carbon consequences of all decisions | Director of Planning and Regeneration & Cabinet Members for Performance & People and Sustainability | Short Term | | | Can be delivered using existing resources |
| E12 | Work in collaboration with others to advertise the Governments Green Homes Grant and associated funding streams | Private sector housing can access funds to help retrofit and improve energy efficiency | Director of Planning and Regeneration & Cabinet Member for Communities & Customers | Short Term | | | Can be delivered using existing resources |
| E13 | Work in collaboration with others to develop bids for the Local authority delivery strands of the Governments Green Homes Grant and associated funding streams | Public and private sector housing can access funds to help retrofit and improve energy efficiency | Director of Planning and Regeneration & Cabinet Member for Sustainability | Short Term | | | |
| E14 | Promote the Warmer Sussex retrofit scheme | Private sector homeowners have easier access to retrofitting advice and suppliers | Director of Planning and Regeneration & Cabinet Members for Housing and Communities & Customers and Sustainability | Short Term | | | Can be delivered using existing resources |

| | | | | | | | |
|--|--|--|--|------------|-------------|-----------|---|
| E15 | Support and facilitate access to the Warm Homes East Sussex scheme | Fuel poverty on the borough reduces | Director of Planning and Regeneration & Cabinet Member for Housing and Communities & Customers | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| E16 | Support the roll out of smart meters through promotion of the SmartEnergyGB scheme | Supports transition to smart energy grid and makes energy use more visible to residents which enables reductions | Director of Planning and Regeneration & Cabinet Member for Housing and Communities & Customers | Short Term | Medium Term | | Can be delivered using existing resources |
| E17 | Support delivery of regional plans- the Greater Brighton Energy Plan and the South2East Energy Strategy | Decarbonisation at a regional level is progressed and joint aims are met | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| E18 | Support the delivery of Communiflex- Zero Carbon Village | Transformation of Barcombe communities energy system to become the UK's first Net Zero Village | OVESCO leading | Short Term | Medium Term | | Externally funded |
| E19 | Support the delivery of Net Zero Firle Village | Creation of a local microgrid for heat and power | BHESCO | Short Term | Medium Term | | Externally funded |
| E20 | Support the delivery of Solar Schools to achieve regional aims | Expansion of PV on schools | ESCC in partnership | Short Term | Medium Term | | Externally funded |
| Actions to make the Council net zero carbon by 2030 | | | | | | | |
| E21 | Complete the Asset Management Strategy (inc. work through Reset & Recovery Programme) | The strategy will enable a long term plan to be developed to reduce energy consumption and increase power generation on our assets | Director of Planning and Regeneration & Cabinet Member for Finance & Assets | Short Term | | | Strategy can be delivered using existing resources- projects will then need costing on a case by case basis |
| E22 | Once Asset Management Strategy is complete- Develop a carbon reduction plan for all remaining non-housing assets | Plan allows for structured and planned delivery to meet carbon neutrality goal | Director of Planning and Regeneration & Cabinet Member for Finance & Assets | Short Term | Medium Term | | Can be delivered using existing resources |
| E23 | Deliver the carbon reduction plan for non-housing assets | Non-housing assets are energy efficient and generating energy | Director of Planning and Regeneration & Cabinet Member for Finance & Assets and Sustainability | | Medium Term | Long Term | Delivery costs to be determined once plan is prepared |
| E24 | Ensure the the council purchases a green electricity provider | 100% of electricity supplied will be REGO backed energy that will qualify a 100% reduction in carbon emissions from consumed electricity | Director of Planning and Regeneration & Cabinet Member for Finance & Assets | Short Term | Medium Term | Long Term | Completed October 2020 |

2. Sustainable Travel and Air Quality

| Action reference | ACTION | OUTCOME | ACTION OWNERS (note: the Cabinet Member for Sustainability has oversight of all actions) | TIMEFRAME | | | RESOURCES |
|---|--|--|--|------------|-------------|-----------|--|
| Actions by the council to enable the District to become net zero carbon by 2030 | | | | | | | |
| T1 | Evaluate car parks for EV charging and prepare proposal for consideration by Councillors by June 2021 | The council can make a decision as to how to progress with increasing charging infrastructure in the town and a new project delivery action will be created if this goes ahead | Director of Service Delivery & Cabinet Members for Finance & Assets and Sustainability | Short Term | | | Proposal can be delivered using existing resources- implementation TBC |
| T2 | Prepare a plan during 2021 to hold regular Car Free Days/temporary road closures such as School Streets especially in areas of high foot fall | Gradual modal shift to reduce private vehicle travel and sustainable travel becoming the norm | Director of Planning and Regeneration & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| T3 | Prepare a plan during 2021 to promote active travel across Lewes District from a public health perspective - work with NHS partners to promote walking groups for example | Improved public health, better AQ and lots of engaging material for the LDC AQ/sustainability web pages/Twitter feed/local media | Director of Planning and Regeneration & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| T4 | Prepare a plan during 2021 to hold sustainability/air quality events with Theatre in Action groups, smoothie bikes, Dr Bike, community groups, etc. | Bringing awareness of AQ/ Sustainability issues to a personal level in a positive and fun environment | Director of Planning and Regeneration & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| T5 | Determine if the council can produce a Construction Code of Practice with guidance on use of low emission non-road mobile machinery and using on-grid energy instead of diesel generators where reasonably practicable | Lowering of emissions from construction sites, particularly in relation to NRMM | Director of Planning and Regeneration & Cabinet Members for Sustainability and Planning & Infrastructure | Short Term | | | Can be delivered using existing resources |
| T6 | Ensure that local planning policy and guidance includes requirements for passive and active EVCPs and cycle parking on all new major developments | Increase of sustainable travel infrastructure utilising planning policy | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| T7 | Work in partnership with ESCC to deliver new cycling and walking initiatives as detailed in the Draft East Sussex Local Cycling & Walking Infrastructure Plan (LCWIP) and seek opportunities for funding. | Additional cycling and walking routes | Director of Planning and Regeneration & Cabinet Members for Planning & Infrastructure and Sustainability | Short Term | Medium Term | | Can be delivered using existing resources |
| T8 | Support development of hydrogen hubs (as per action E6) | Enable and develop a clean hydrogen economy for transport and heating | Director of Planning and Regeneration & Cabinet Members for Planning & Infrastructure and Sustainability | Short Term | Medium Term | | |

| | | | | | | | |
|--|--|--|---|------------|-------------|--|---|
| T9 | Support Greater Brighton to develop a network of EV chargepoints so that all residents are 'within a convenient distance' of a place to charge their car (Pledge #4) | Coherent network is developed | Director of Planning and Regeneration & Cabinet Members for Planning & Infrastructure and Sustainability | Short Term | Medium Term | | |
| T10 | Work in partnership with Greater Brighton to have enabled 50% of Greater Brighton's fleet vehicles to be low carbon by 2025 (Pledge #3) | | Director of Planning and Regeneration & Cabinet Member for Sustainability | Short Term | Medium Term | | |
| T11 | Enable expansion of car clubs through discussions with operators, parking space owners and the community | Residents can car share instead of owning their own vehicle- reduces vehicle numbers in town and provides control over type/efficiency of vehicle used. | Director of Planning and Regeneration & Cabinet Member for Sustainability | Short Term | Medium Term | | Can be delivered using existing resources |
| T12 | Determine how to support reduction in emissions from deliveries to local businesses/residents in particular 'last mile deliveries.' Eco - cargo bikes, restricted delivery times, provision of logistics facilities. | Reduction of traffic and emissions during peak travel times. Healthier, quieter and less polluted streets with potential to prioritise walkers/cyclists so increasing dwell time and improving local economy | Director of Planning and Regeneration & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| T13 | Determine if the council can install pocket parks, micro green/blue spaces to improve diversity and AQ encouraging active travel | Raises appeal of active travel to visitors and residents | Director of Planning and Regeneration & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |
| T14 | Develop a localised and targeted education campaign aimed at public service vehicles, consider adopting FPN powers | Discourage unnecessary idling by taxis, coaches and other vehicles | Director of Service Delivery & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| T15 | Develop a pathway to a low carbon taxi fleet | Reduced carbon emissions and improved air quality | Director of Service Delivery & Cabinet Member for Sustainability | Short Term | Medium Term | | Can be delivered using existing resources |
| T16 | Organise partnership work on transport issues required at a county level and nationally, in partnership with community groups- in particular public transport and trains | Coherent district infrastructure is delivered to achieve transport decarbonisation aims | Director of Planning and Regeneration & Cabinet Members for Sustainability and Planning & Infrastructure | Short Term | Medium Term | | Can be delivered using existing resources |
| Actions to make the Council net zero carbon by 2030 | | | | | | | |
| T17 | Complete Phase 1 of the waste and recycling vehicle fleet review | Optimisation of routes and fleet reduction | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |

| | | | | | | | |
|------------|--|---|--|-------------------|--------------------|------------------|--|
| T18 | Produce pathway to decarbonise non- RCV fleet vehicles operated by the Council (small & medium vans, cars, other vehicles) TBD at Fleet Working Group 17 Dec | Plan to move to a low carbon fleet | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Fleet decisions to be costed at the appropriate time |
| T19 | Remove fossil fuel fleet vehicles (small and medium vans, cars, other vehicles) | Low carbon fleet achieved | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | | Medium Term | Long Term | Fleet decisions to be costed at the appropriate time |
| T20 | Introduce sustainability criteria into council procurement policies with weighting given to tenderers with proven sustainability policy particularly in the areas of logistics and servicing due to their high vehicle use and emissions | Support for sub-contractors with green credentials to work with LEC | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |

3. Biodiversity

| Action reference | ACTION | OUTCOME | ACTION OWNERS (note: the Cabinet Member for Sustainability has oversight of all actions) | TIMEFRAME | | | RESOURCES |
|------------------|--------|---------|--|-----------|--|--|-----------|
|------------------|--------|---------|--|-----------|--|--|-----------|

Actions by the council to enable the District to become net zero carbon by 2030 and to address the ecological emergency

| | | | | | | | |
|-----------|---|--|--|-------------------|--------------------|------------------|---|
| B1 | Develop and adopt a Biodiversity Strategy and action plan | We will have developed our aims and actions to deliver biodiversity improvements | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |
| B2 | Local Plans – work closely with Planning Policy and planners to achieve biodiversity wording that is fit for purpose and ambitious to arrest declines | Green and biodiversity beneficial Local Plans | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | | Medium Term | | Can be delivered using existing resources |
| B3 | Develop and adopt a Biodiversity Net Gain Technical Note- due February 2021 | Developers have specific guidance to meet the biodiversity net gain requirement on all sites | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | Short Term | | | Can be delivered using existing resources |
| B4 | Council Officer training in biodiversity to be completed - Sussex Wildlife Trust could provide this | Decision makers are better informed about biodiversity and | Director of Planning and Regeneration & Cabinet Member for Performance & People | Short Term | | | Can be delivered using existing resources |
| B5 | Provide direct assistance when required to tree planting projects at suitable sites if required by others | Carbon capture and improved biodiversity | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | Medium Term | Long Term | Can be delivered using existing resources |

| | | | | | | | |
|------------|--|--|--|------------|-------------|-----------|---|
| B6 | To work with the Sussex Wildlife Trust to deliver their 'Vision for Sussex' | Sussex is a place where people and nature thrive | Sussex Wildlife Trust leading | Short Term | Medium Term | | |
| B7 | Investigate possible partnership with the Sussex Wildlife Trust to deliver a district wide approach to the wildlife crisis | To work with landowners, partnerships and community groups to build a resilient ecological network throughout the district | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | |
| B8 | Develop pipeline of projects for biodiversity net gain and 'offsetting' | Increase in biodiversity and projects enabled | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | Medium Term | | Can be delivered using existing resources |
| B9 | Review land holdings for possible biodiversity and nature based climate solutions and carry out feasibility work | Internal and Partnership projects enabled | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | Medium Term | | Can be delivered using existing resources |
| B10 | Complete University of Brighton student GIS mapping project for areas of land suitable for large scale tree planting - Due July 2021 | GIS tools are easily available for all officers to use to aid decision making | Director of Planning and Regeneration & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| B11 | Support Changing Chalk bid and project if successful | Community ranger for countryside/nature/downland education and involvement | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |
| B12 | Continue work with community groups, education and communication | Community groups encouraged and work progressed | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| B13 | Continue to provide project support for partnership projects, including expertise, volunteer management and fund raising support | Partners projects are enabled and supported to achieve multiple outcomes dependent on project | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| B14 | Support Greater Brighton to re- establish a 10 mile Kelp forest off the coast of Sussex | A new kelp forest could capture 70,000 tonnes carbon per year and help prevent coastal erosion | Director of Regeneration & Planning & Cabinet Member for Sustainability | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| B15 | Support Greater Brighton and the University of Sussex in rewilding and rain garden research | Knowledge is developed and shared to enable more and better designed projects | Director of Regeneration & Planning & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |

| Actions to make the Council net zero carbon by 2030 and address the ecological emergency on its own land | | | | | | | |
|--|---|---|--|------------|-------------|--|---|
| B16 | Develop a programme of works on LDC land to increase joining up of biodiversity corridors & ecological networks | Increase in biodiversity Improved well being of residents | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | Medium Term | | Resources to be determined |
| B17 | Determine & provide suitable land to enable tree planting and re-wilding | Carbon capture through trees, increased biodiversity, improved mental wellbeing, increased summer shading | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | Medium Term | | |
| B18 | Improve and reduce mowing practices on District Council land | Improved habitat for insects | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |
| B19 | Reduce the use of pesticides on District Council land and lobby East Sussex County Council to do the same | Improved habitat for insects | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |
| B20 | Increase wildflower and pollinator planting where suitable | Improved habitat for insects | Director of Service Delivery & Cabinet Members for Sustainability and for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |

4. Agriculture & Food

| Action reference | ACTION | OUTCOME | ACTION OWNERS (note: the Cabinet Member for Sustainability has oversight of all actions) | TIMEFRAME | | | RESOURCES |
|---|---|--|--|------------|-------------|-----------|---|
| Actions by the council to enable the District to become net zero carbon by 2030 and to address the ecological emergency | | | | | | | |
| A1 | Support local food growing initiatives by making suitable land available and incorporating it into our work with social housing tenants as part of DOHS | More residents can access local food and grow their own | Director of Regeneration & Planning & Cabinet Member for Housing | Short Term | Medium Term | | Can be delivered using existing resources |
| A2 | Work with SCDA and partners to develop a food partnership- led by SCDA and funded by ESCC | By end of 2021 SCDA intend to have-governance structure for district food partnership- draft strategy or action plan- food systems map | Director of Regeneration & Planning & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| A3 | Work with the food partnership to enable more local food distribution | Residents can access locally produced food more easily | Director of Regeneration & Planning & Cabinet Member for Sustainability | | Medium Term | | Can be delivered using existing resources |
| A4 | Work with the Climate Action Forum and others to share best practice on local food distribution | Best practice (such as Lewes Friday Food Market) and knowledge is shared to help new market establish | Director of Regeneration & Planning & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| A5 | Support initiatives that promote or enable low carbon and nature-friendly farming locally eg South East Downs Farm Cluster | This wider working will facilitate local (Sussex) food production | Director of Regeneration & Planning & Cabinet Member for Sustainability | Short Term | Medium Term | Long Term | Resources to be determined |

| 5. Reducing Emissions from Waste | | | | | | | |
|---|--|--|--|------------|-------------|-----------|--|
| Action reference | ACTION | OUTCOME | ACTION OWNERS (note: the Cabinet Member for Sustainability has oversight of all actions) | TIMEFRAME | | | RESOURCES |
| Actions by the council to enable the District to become net zero carbon by 2030 | | | | | | | |
| W1 | Review waste & recycling service provision to align them with the requirements of increasing recycling and decreasing residual waste. | We recycle more than we incinerate, and our collection methods and schedules enable that and champion it. | Director of Service Delivery & Cabinet Member for Recycling, Waste & Open Spaces | Short Term | Medium Term | | Can be delivered using existing resources |
| W2 | Continue with planned communications with regular emphasis on food waste reduction eg. 'How to use Christmas leftovers' and incorporate these comms into the overarching sustainability comms plan | Consistent messaging and comms planned on sustainability issues | Director of Service Delivery & Cabinet Member for Recycling, Waste & Open Spaces | Short Term | | | |
| W3 | Help develop local reuse and repair schemes which divert waste, for example Freegle, Freecycle, repair cafes etc. | Encourages a local circular economy and these schemes provide the most help and benefit to people in greater need. | Director of Service Delivery & Cabinet Member for Recycling, Waste & Open Spaces | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| Actions to make the Council net zero carbon by 2030 | | | | | | | |
| W4 | Undertake fleet review - produce pathway to zero carbon RCV (refuse collection vehicle) fleet | Plan in place to deliver zero carbon waste and recycling fleet | Director of Service Delivery & Cabinet Member for Recycling, Waste & Open Spaces | Short Term | | | Can be delivered using existing resources |
| W5 | Deliver on zero carbon RCV fleet | Zero carbon fleet achieved | Director of Service Delivery & Cabinet Member for Recycling, Waste & Open Spaces | | Medium Term | Long Term | Financial implications to be assessed separately at the time |
| W6 | Eliminate use of Single Use Plastic (SUP) at LDC operated events and third party events supported by LDC wherever possible | Reduced plastic waste. | Director of Service Delivery & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |
| W7 | Eliminate use of unsustainable paper for printed marketing materials and within democratic services | Reduced emissions from consumption of paper products | Director of Regeneration & Planning & Cabinet Member for Sustainability | Short Term | | | Can be delivered using existing resources |

| 6. Water | | | | | | | |
|---|--|--|--|------------|-------------|-----------|--|
| Action reference | ACTION | OUTCOME | ACTION OWNERS (note: the Cabinet Member for Sustainability has oversight of all actions) | TIMEFRAME | | | RESOURCES |
| Actions by the council to enable the District to become net zero carbon and climate resilient by 2030 | | | | | | | |
| WA1 | Complete the new Local Plan and ensure that planning policies and guidance reflect our strategic goals for water | New development is low carbon, energy efficient and is resilient to future climate change | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | | Medium Term | | Can be delivered using existing resources |
| WA2 | Expand upon the successful Sussex Flow Initiative and introduce other natural flood management projects | Flood risk is reduced using natural methods which also supports the environment | Director of Service Delivery & Cabinet Member for Sustainability | Short Term | Medium Term | | Resources to be determined |
| WA3 | Work in partnership with the Environment Agency to explore the options viable to manage the risks posed by the undefended cliffs at The Esplanade, Telscombe Cliffs. | The Environment Agency's larger technical capability and resources can be utilised to seek an appropriate solution to managing the risks posed by an eroding coast at this location. | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | Short Term | Medium Term | Long Term | Partnership working delivered using existing resources |
| WA4 | Deliver a coastal management climate change workshop for experts early 2021 and subsequently determine next steps. | Will complete this important engagement that was not completed during the initial strategy engagement period and will start a process of re-engagement with members on this issue. | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | Short Term | | | Can be delivered using existing resources |
| WA5 | Support the Greater Brighton partnership with Southern Water to install water recycling on a housing estate (Pledge #2) and evaluate the learning from the pilot | Research and knowledge is gained and can be transferred for use on new developments within our district | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | Short Term | Medium Term | | Can be delivered using existing resources |
| WA6 | Ensure planning policy reflects the need to avoid substantial development on flood plain | Essential flood plain is retained and flood risk is minimised | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | Short Term | Medium Term | Long Term | Can be delivered using existing resources |
| WA7 | Develop guidance to meet water consumption for new builds of no more than 80?? litres per day (part of GB pledge #10) | Preservation of water resources | Director of Planning and Regeneration & Cabinet Member for Planning & Infrastructure | | Medium Term | | Can be delivered using existing resources |
| Actions to make the Council net zero carbon by 2030 | | | | | | | |
| WA8 | Once Asset Management Strategy is complete- As per action E22- Develop a water consumption reduction plan for all remaining non-housing assets | Plan allows for structured and planned delivery to meet carbon neutrality goal | Director of Planning and Regeneration & Cabinet Member for Finance & Assets | Short Term | | | Can be delivered using existing resources |

| 7. Circular Economy and Community Wealth | | | | | | | |
|---|---|--|--|------------|-------------|--|---|
| Action reference | ACTION | OUTCOME | ACTION OWNERS (note: the Cabinet Member for Sustainability has oversight of all actions) | TIMEFRAME | | | RESOURCES |
| Actions by the council to enable the District to enable a green recovery and become net zero carbon by 2030 | | | | | | | |
| C1 | Implement the 'Re-imagining Lewes District Action Plan' As per the cabinet paper December 2020 | The council will have delivered on the following work streams: 1. Lewes District Council as a community wealth building council 2. Progressive procurement of goods and services 3. Fair employment and just labour markets 4. Socially productive use of land and assets 5. Making financial power work for local places 6. Plural ownership of the economy | Director of Planning and Regeneration & Cabinet Member for Finance & Assets | Short Term | Medium Term | | Can be delivered using existing resources |
| C2 | Produce a council sustainable procurement strategy with a focus on local and sustainable purchasing | Reduced emissions from procurement. Increased local spend and resulting improved community wealth | Director of Planning and Regeneration & Cabinet Member for Finance & Assets | Short Term | | | Can be delivered using existing resources |
| C3 | Complete the Net Zero Innovation Fund project on alternative finance models- DUE July 2021 | Understanding of which projects are suitable for community funding and investment models, seed funding and project pipeline | Director of Planning and Regeneration & Cabinet Member for Finance & Assets | Short Term | | | Can be delivered using existing resources |
| C4 | Determine if the council can set up a community investment programme potentially using municipal bonds (utilising output of Net Zero Innovation Fund) | Incorporate this decision into September 2021 strategy update report | Director of Planning and Regeneration & Cabinet Member for Finance & Assets | Short Term | | | Can be delivered using existing resources |
